

White Lightning® Silicone Rubber Window & Door

Physical Properties: Silicone Rubber Window & Door

Type:	100% Siliconized Rubber	Service Temperature:	-80°F to 450°F
Color:	White, Clear, Almond	Odor:	Moderate
Shelf Life:	12 Months	Shrinkage:	Low
Full Cure Time:	24 Hours	Vehicle:	Solvent Based
Tack Free Time:	30 Minutes	Weight/Gallon:	8.5 lbs/gal
Application Temperature:	40°F to 140°F		

Performance Data:

Joint Movement Capability:	Good	Water Resistance:	Excellent
Joint Size:	1/2" x 1/2"	Rust Resistance:	Excellent
Clean-Up:	Mineral Spirits	Linear Coverage:	
Flexibility:	Good	10 oz Cartridge	
Painting:	Do Not Paint	1/8" Bead Application	96.7 ft
Mildew Resistance:	Excellent	1/4" Bead Application	24.2 ft

Product Description:

White Lightning® Silicone Rubber Window & Door is a 100% silicone, interior/exterior sealant.

Basic Uses:

Silicone Rubber Window & Door is commonly applied at windows, doors, vinyl siding, trim, ducts, pipes, chimneys and foundations. It will adhere to many surfaces including wood, glass, fiberglass, vinyl, metal and many plastics.

Surface Preparation:

Surface should be clean, dry, free from oils, dirt, old caulking, old paint or other contaminants.

Painting:

Do not paint.

Cautions:

DIRECT CONTACT WITH UNCURED SEALANT IRRITATES EYES AND SKIN! Use with adequate ventilation. Water/humidity causes curing which releases acetic acid vapors. Avoid contact with eyes and skin. Wash hands after using. Do not transfer contents to other containers for storage.

Limitations:

For best results, apply at temperatures above 40°F. Do not apply to frozen or frost covered surfaces. Not for use below grade, on aquariums or for marine use below the water line. Do not apply to granite, limestone or masonry materials.

Specifications:

Meets or exceeds performance requirements of Federal Specification TT-S-001543A Class A (COM-NBS) for silicone building sealants and TT-S-00230C Class A (COM-NBS) for one-component sealants, Canadian Specification CAN2-19, 13-M82 and ASTM C920 and is NSF and USDA listed.
