| Supplemental label<br>elements | : FOR INDUSTRIAL USE ONLY   |

#### **Special packaging requirements**

Not applicable.

#### 2.3 Other hazards

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

Other hazards which do : None known. not result in classification

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

# Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

# **SECTION 4: First aid measures**

| 4.1 Description of first aid n | neasures  |
|--------------------------------|---|
| General                        | <ul> <li>In all cases of doubt, or when symptoms persist, seek medical attention. Never give<br/>anything by mouth to an unconscious person. If unconscious, place in recovery<br/>position and seek medical advice.</li> </ul>   |
| Eye contact                    | <ul> <li>Check for and remove any contact lenses. Immediately flush eyes with running<br/>water for at least 15 minutes, keeping eyelids open. Seek immediate medical<br/>attention.</li> </ul>   |
| Inhalation                     | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br>trained personnel.  |
| Skin contact                   | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognized skin cleanser. Do NOT use solvents or thinners.</li> </ul>  |
| Ingestion                      | <ul> <li>If swallowed, seek medical advice immediately and show this container or label.</li> <li>Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>  |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

# 4.2 Most important symptoms and effects, both acute and delayed

#### M153A

# **SECTION 4: First aid measures**

There are no data available on the mixture itself. Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]. See Sections 2 and 3 for details.

Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

#### 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | : Treat symptomatically. Contact poison treatment specialist immediately if large |
|---------------------|---|
|                     | quantities have been ingested or inhaled.   |
| Specific treatments | : No specific treatment.  |

See toxicological information (Section 11)

| SECTION 5: Firefighting measures                           |     |   |
|--|-----|---|
| 5.1 Extinguishing media<br>Suitable extinguishing<br>media | :   | Recommended: alcohol-resistant foam, CO <sub>2</sub> , powders, water spray or mist.  |
| Unsuitable extinguishing<br>media                          | :   | Do not use water jet.   |
| 5.2 Special hazards arising fr                             | on  | n the substance or mixture  |
| Hazards from the substance or mixture                      | :   | Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.  |
| Hazardous combustion<br>products                           | :   | Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.                                     |
| 5.3 Advice for firefighters                                |     |   |
| Special protective actions<br>for fire-fighters            | :   | Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses.   |
| Special protective equipment for fire-fighters             | :   | Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear.  |
| SECTION 6: Accidental r                                    | el  | ease measures   |
| 6.1 Personal precautions, pro                              | ote | ctive equipment and emergency procedures  |
| For non-emergency<br>personnel                             | :   | Exclude sources of ignition and ventilate the area. Avoid breathing vapor or mist.<br>Refer to protective measures listed in sections 7 and 8.              |
|  |     | Keep unnecessary and unprotected personnel from entering.   |
| For emergency responders                                   | :   | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the |

# **SECTION 6: Accidental release measures**

| 6.2 Environmental precautions                                   | : Do not allow to enter drains or watercourses. If the product contaminates lakes, rivers, or sewers, inform the appropriate authorities in accordance with local regulations.   |
|---|--|
| 6.3 Methods and materials<br>for containment and<br>cleaning up | Contain and collect spillage with non-combustible, absorbent material e.g. sand,<br>earth, vermiculite or diatomaceous earth and place in container for disposal<br>according to local regulations (see Section 13). Preferably clean with a detergent.<br>Avoid using solvents. |
| 6.4 Reference to other sections                                 | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

| 7.1 Precautions for safe<br>handling                                   | <ul> <li>Prevent the creation of flammable or explosive concentrations of vapors in air and avoid vapor concentrations higher than the occupational exposure limits. In addition, the product should only be used in areas from which all naked lights and other sources of ignition have been excluded. Electrical equipment should be protected to the appropriate standard. Mixture may charge electrostatically: always use earthing leads when transferring from one container to another. Operators should wear antistatic footwear and clothing and floors should be of the conducting type.</li> <li>Keep away from heat, sparks and flame. No sparking tools should be used. Avoid contact with skin and eyes. Avoid the inhalation of dust, particulates, spray or mist arising from the application of this mixture. Avoid inhalation of dust from sanding.</li> <li>Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed.</li> <li>Put on appropriate personal protective equipment (see Section 8). Never use pressure to empty. Container is not a pressure vessel. Always keep in containers made from the same material as the original one. Comply with the health and safety at work laws.</li> <li>Do not allow to enter drains or watercourses.</li> <li>Information on fire and explosion protection</li> <li>Vapors are heavier than air and may spread along floors. Vapors may form explosive mixtures with air.</li> <li>When operators, whether spraying or not, have to work inside the spray booth, ventilation is unlikely to be sufficient to control particulates and solvent vapors in all cases. In such circumstances, they should wear a compressed-air-fed respirator during the spraying process and until the particulate and solvent vapor</li> </ul> |
|--|---|
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | <ul> <li>Store in accordance with local regulations.</li> <li>Notes on joint storage<br/>Keep away from: oxidizing agents, strong alkalis, strong acids.</li> <li>Additional information on storage conditions<br/>Observe label precautions. Store in a dry, cool and well-ventilated area. Keep away<br/>from heat and direct sunlight. Keep away from sources of ignition. No smoking.<br/>Prevent unauthorized access. Containers that have been opened must be carefully<br/>resealed and kept upright to prevent leakage.</li> <li>Contaminated absorbent material may pose the same hazard as the spilled product.<br/>Store in closed original container at temperatures between 5°C and 25°C.</li> </ul>   |

# **SECTION 7: Handling and storage**

#### 7.3 Specific end use(s)

| Recommendations            | : Not available. |
|----------------------------|------------------|
| Industrial sector specific | : Not available. |
| solutions                  |                  |

Good housekeeping standards, regular safe removal of waste materials and regular maintenance of spray booth filters will minimise the risks of spontaneous combustion and other fire hazards.

# Before use of this material please refer to the Exposure Scenario(s) if attached for the specific end use, control measures and additional PPE considerations.

# SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient name | Exposure limit values  |
|-------------------------|--|
| 2-Propanol              | EH40/2005 WELs (United Kingdom (UK), 1/2020).<br>STEL: 1250 mg/m <sup>3</sup> 15 minutes.<br>STEL: 500 ppm 15 minutes.<br>TWA: 999 mg/m <sup>3</sup> 8 hours.<br>TWA: 400 ppm 8 hours. |

#### **Biological exposure indices**

No exposure indices known.

#### Recommended monitoring procedures : Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

: Regular monitoring of all work areas should be carried out at all times, including areas that may not be equally ventilated.

#### **DNELs/DMELs**

| Product/ingredient name | Туре | Exposure                | Value                 | Population                           | Effects  |

# **SECTION 8: Exposure controls/personal protection**

|                                    |   | The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.  |
|------------------------------------|---|--|
| Body protection                    | : | Personnel should wear antistatic clothing made of natural fibers or of high-<br>temperature-resistant synthetic fibers.  |
|                                    | : | Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. Refer to<br>European Standard EN 1149 for further information on material and design<br>requirements and test methods. |
| Other skin protection              | : | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection             | : | Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Recommended: A2P2 (EN14387). Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.   |
| Environmental exposure<br>controls | : | Do not allow to enter drains or watercourses.  |

Before use of this material please refer to the Exposure Scenario(s) if attached for the specific end use, control measures and additional PPE considerations. The information contained in this safety data sheet does not constitute the user's own assessment of workplace risks, as required by other health and safety legislation. The provisions of the national health and safety at work regulations apply to the use of this product at work.

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

**10.6 Hazardous decomposition products** : Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.

# Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

# **SECTION 11: Toxicological information**

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

There are no data available on the mixture itself. Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]. See Sections 2 and 3 for details.

Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

# M153A

# **SECTION 11: Toxicological information**

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

#### Acute toxicity

| Product/ingredient name                       | Result      | Species | Dose        | Exposure |
|---|-------------|---------|-------------|----------|
| Phenylmethanol                                | LD50 Dermal | Rabbit  | 2000 mg/kg  | -        |
|   | LD50 Oral   | Rat     | 1230 mg/kg  | -        |
| 2-Propanol                                    | LD50 Dermal | Rabbit  | 12800 mg/kg | -        |
|   | LD50 Oral   | Rat     | 5000 mg/kg  | -        |
| 2,4,6-tris<br>(dimethylaminomethyl)<br>phenol | LD50 Dermal | Rat     | 1280 mg/kg  | -        |
|   | LD50 Oral   | Rat     | 1200 mg/kg  | -        |

#### Acute toxicity estimates

| Route               | ATE value    |  |
|---------------------|--------------|--|
| Oral                | 344.01 mg/kg |  |
| Inhalation (vapors) | 26.04 mg/l   |  |

#### Irritation/Corrosion

| Product/ingredient name | Result                   | Species | Score | Exposure     | Observation |

| Methods of disposal                 | :  | The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |  |
| Disposal considerations             | :  | Using information provided in this safety data sheet, advice should be obtained from<br>the relevant waste authority on the classification of empty containers. Empty<br>containers must be scrapped or reconditioned. Dispose of containers contaminated<br>by the product in accordance with local or national legal provisions.  |  |
| European waste<br>catalogue (EWC)   | :  | packaging containing residues of or contaminated by hazardous substances 15 01 10*  |  |

## **SECTION 13: Disposal considerations**

Special precautions
 This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

**14.6 Special precautions for user** : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

**14.7 Maritime transport in** : Not applicable. **bulk according to IMO** 

instruments

Multi-modal shipping descriptions are provided for informational purposes and do not consider container sizes. The presence of a shipping description for a particular mode of transport (sea, air, etc.), does not indicate that the product is packaged suitably for that mode of transport. All packaging must be reviewed for suitability prior to shipment, and compliance with the applicable regulations is the sole responsibility of the person offering the product for transport. People loading and unloading dangerous goods must be trained on all of the risks deriving from the substances and on all actions in case of emergency situations.

# **SECTION 15: Regulatory information**

#### Notice to reader

In accordance with Regulation (EC) 1907/2006, REACH Regulation, Articles 31, 37, any required hazard-related information on the use of substances received as downstream user will be sent forward. Consequently, the safety data sheets for some products will contain a SUMI - Safe Use of Mixture Information - attached to the safety data sheet.

SUMI(s) will be added to the SDS for products if both the following conditions are met:

• The product is classified as hazardous for health

• The product contains one or more REACH-registered substances for which extended safety data sheets (exposure scenarios) have been provided

It is recommended that each customer or recipient of this Safety Data Sheet (SDS) study it carefully and consult resources, as necessary or appropriate, to become aware of and understand the data contained in this SDS and any hazards associated with the product. This information is provided in good faith and believed to be accurate as of the effective date herein. However, no warranty, express or implied, is given. The information presented here applies only to the product as shipped. The addition of any material can change the composition, hazards and risks of the product. Products shall not be repackaged, modified, or tinted except as specifically instructed by the manufacturer, including but not limited to the incorporation of products not specified by the manufacturer, or the use or addition of products in proportions not specified by the manufacturer. Regulatory requirements are subject to change and may differ between various locations and

# **SECTION 16: Other information**

jurisdictions. The customer/buyer/user is responsible to ensure that his activities comply with all country, federal, state, provincial or local laws. The conditions for use of the product are not under the control of the manufacturer; the customer/buyer/user is responsible to determine the conditions necessary for the safe use of this product. The customer/buyer/user should not use the product for any purpose other than the purpose shown in the applicable section of this SDS without first referring to the supplier and obtaining written handling instructions. Due to the proliferation of sources for information such as manufacturer-specific SDS, the manufacturer cannot be responsible for SDSs obtained from any other source.
