# **SAFETY DATA SHEET**

### ARTE URBANA VERDE BRISA

#### Section 1. Identification **GHS** product identifier : ARTE URBANA VERDE BRISA **Product code** : 959 **Product type** : Aerosol Relevant identified uses of the substance or mixture and uses advised against **Identified uses** Paint or paint related material. **Supplier's details** : SHERWIN-WILLIAMS do Brasil – Divisão Sumaré Rodovia Anhanguera, KM 108.8 - Nova Veneza Sumaré - São Paulo CEP: 13181-902 www.colorgin.com.br colorsac@sherwin.com.br 55 (19) 2122-8800 / (SAC) 0800-7023569 55 (19) 2122-8900 : (11) 2661-8571 / 08000 - 148110 CEATOX (Centro de Toxicologia) 24 horas or 55 **Emergency telephone** (19) 2122-8800 (Emergency contact available 24 hours a day) number: Section 2. Hazards identification : AEROSOLS - Category 1 **Classification of the** SKIN IRRITATION - Category 2 substance or mixture **EYE IRRITATION - Category 2A** SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2 **GHS** label elements **Hazard pictograms** Signal word : Danger **Hazard statements** : Extremely flammable aerosol. Pressurized container: may burst if heated. Causes skin irritation. Causes serious eye irritation. May cause damage to organs through prolonged or repeated exposure. **Precautionary statements** General : Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand. **Prevention** : Wear protective gloves. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not breathe dust or mist. Wash thoroughly after handling. Do not pierce or burn, even after use. Response : Get medical advice or attention if you feel unwell. Take off contaminated clothing and wash it before reuse. IF ON SKIN: Wash with plenty of water. If skin irritation occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Storage : Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F.

Date of issue/Date of revision

If eye irritation persists: Get medical advice or attention.

### Section 2. Hazards identification

**Disposal** 

: Dispose of contents and container in accordance with all local, regional, national and international regulations.

Other hazards which do not : None known. result in classification

## Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

| <b>CAS number/other identifiers</b> |   |          |
|-------------------------------------|---|----------|
| EC number                           | ÷ | Mixture. |

| Ingredient name        | %         | CAS number |
|------------------------|-----------|------------|
| Acetone                | ≥10 - ≤25 | 67-64-1    |
| Butane                 | ≥10 - ≤25 | 106-97-8   |
| Propane                | ≥10 - ≤25 | 74-98-6    |
| Ethylbenzene           | ≥10 - ≤25 | 100-41-4   |
| Xylene, mixed isomers  | ≥10 - ≤25 | 1330-20-7  |
| Titanium Dioxide       | ≤5        | 13463-67-7 |
| 1-Methyl-2-Pyrrolidone | ≤0.3      | 872-50-4   |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact  | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
|--------------|--|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention<br>following exposure or if feeling unwell. If unconscious, place in recovery position<br>and get medical attention immediately. Maintain an open airway. Loosen tight<br>clothing such as a collar, tie, belt or waistband.   |
| Skin contact | : Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Continue to rinse for at least 10 minutes. Get medical attention. Wash clothing before reuse. Clean shoes thoroughly before reuse.   |
| Ingestion    | : Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention following exposure or if feeling unwell. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |

#### Most important symptoms/effects, acute and delayed

| Potential acute health eff     | <u>ects</u>         |                               |                  |                |      |
|--------------------------------|---------------------|-------------------------------|------------------|----------------|------|
| Eye contact                    | : Causes se         | rious eye irritation.         |                  |                |      |
| Inhalation                     | : No known          | significant effects or critic | al hazards.      |                |      |
| Skin contact                   | : Causes sk         | in irritation.                |                  |                |      |
| Ingestion                      | : No known          | significant effects or critic | al hazards.      |                |      |
| Date of issue/Date of revision | : 31, Jan,<br>2024. | Date of previous issue        | : 30, Sep, 2023. | Version : 1.13 | 2/11 |

## Section 4. First aid measures

| Over-exposure signs/sym    | <u>itoms</u>   |
|----------------------------|--|
| Eye contact                | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
| Inhalation                 | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing  |
| Skin contact               | : Adverse symptoms may include the following:<br>irritation<br>redness   |
| Ingestion                  | : No specific data.  |
| Indication of immediate me | dical attention and special treatment needed, if necessary   |
| Notes to physician         | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>                          |
| Specific treatments        | : No specific treatment.   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

### See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media                 | : None known.   |
| Specific hazards arising from the chemical     | : Extremely flammable aerosol. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. Gas may accumulate in low or confined areas<br>or travel a considerable distance to a source of ignition and flash back, causing fire<br>or explosion. Bursting aerosol containers may be propelled from a fire at high speed. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | Promptly isolate the scene by removing all persons from the vicinity of the incident if<br>there is a fire. No action shall be taken involving any personal risk or without<br>suitable training. Move containers from fire area if this can be done without risk.<br>Use water spray to keep fire-exposed containers cool.   |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

### Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

## Section 6. Accidental release measures

| For non-emergency<br>personnel | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. In the case of aerosols being ruptured, care should be taken due to the<br>rapid escape of the pressurized contents and propellant. If a large number of<br>containers are ruptured, treat as a bulk material spillage according to the<br>instructions in the clean-up section. Do not touch or walk through spilled material.<br>Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid<br>breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator<br>when ventilation is inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|-----|--|
| For emergency responders       | :   | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| Methods and materials for co   | ont | ainment and cleaning up  |
| Small spill                    | :   | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an  |

|             | contractor.   |
|-------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal |
|             | emergency contact information and Section 13 for waste disposal.  |

appropriate waste disposal container. Dispose of via a licensed waste disposal

## Section 7. Handling and storage

| Precautions for safe handling                                      |   |   |
|--|---|---|
| Protective measures  | : | Put on appropriate personal protective equipment (see Section 8). Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50°C. Do not pierce or burn, even after use. Do not breathe vapor or mist. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Empty containers retain product residue and can be hazardous. |
| Advice on general<br>occupational hygiene                          | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store in accordance with local regulations. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

## Section 8. Exposure controls/personal protection

#### Control parameters

### Occupational exposure limits

| Ingredient name       | Exposure limits  |
|-----------------------|--|
| Acetone               | Ministry of Labor and Employement (Brazil, 11/2001).                     |
|                       | TWA: 780 ppm 8 hours.  |
|                       | TWA: 1870 mg/m <sup>3</sup> 8 hours.                                     |
| Butane                | Ministry of Labor and Employement (Brazil, 11/2001).                     |
|                       | TWA: 470 ppm 8 hours.  |
|                       | TWA: 1090 mg/m³ 8 hours.   |
| Propane               | Ministry of Labor and Employement (Brazil, 11/2001). Oxygen              |
|                       | Depletion [Asphyxiant].  |
| Ethylbenzene          | Ministry of Labor and Employement (Brazil, 11/2001).                     |
|                       | TWA: 78 ppm 8 hours.   |
|                       | TWA: 340 mg/m <sup>3</sup> 8 hours.                                      |
| Xylene, mixed isomers | Ministry of Labor and Employement (Brazil, 11/2001). [Xylenes            |
|                       | (o-, m-, p- isomers)]  |
|                       | TWA: 78 ppm 8 hours.   |
|                       | TWA: 340 mg/m <sup>3</sup> 8 hours.                                      |
| Titanium Dioxide      | ACGIH TLV (United States, 1/2023).                                       |
|                       | TWA: 2.5 mg/m <sup>3</sup> 8 hours. Form: respirable fraction, finescale |
|                       | particles  |

The information contained in this safety data sheet does not constitute the user's own assessment of workplace risks, as required by other health and safety legislation. The provisions of the national health and safety at work regulations apply to the use of this product at work.

| Appropriate engineering<br>controls | :           | Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineerin controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |   |   |  | ering<br>as,        |       |
|-------------------------------------|-------------|---|---|---|--|---------------------|-------|
| Environmental exposure controls     | :           | they compl<br>cases, fum  | from ventilation or work p<br>y with the requirements of<br>e scrubbers, filters or eng<br>will be necessary to reduc   | f environmental prote<br>ineering modification  | ction legislatio<br>is to the proces             | n. In so            |       |
| Individual protection meas          | <u>ures</u> |   |   |   |  |                     |       |
| Hygiene measures                    | :           | eating, smo<br>Appropriate<br>Wash conta<br>safety show   | ds, forearms and face tho<br>oking and using the lavato<br>e techniques should be us<br>aminated clothing before<br>vers are close to the work<br>ontaminated clothing shou | ory and at the end of | he working pe<br>ally contamina<br>eyewash stati | riod.<br>Ited clotł | hing. |
| Eye/face protection                 | :           | assessmer<br>gases or du  | wear complying with an ap<br>nt indicates this is necessa<br>usts. If contact is possible<br>assessment indicates a h   | ary to avoid exposure<br>e, the following protec  | e to liquid splas<br>ction should be             | shes, mis<br>worn,  | sts,  |
| Skin protection                     |             |   |   |   |  |                     |       |
| Hand protection                     | :           | Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |   |   |  |                     |       |

## Section 8. Exposure controls/personal protection

|                        | Recommended gloves: Nitrile gloves   |
|------------------------|--|
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.                        |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> <li>Nota(s): Closed shoes are recommended for protection.</li> </ul>   |
| Respiratory protection | <ul> <li>Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.</li> <li>If personal exposure cannot be controlled below applicable limits by ventilation, wear a properly fitted organic vapor/particulate respirator.</li> </ul> |

## Section 9. Physical and chemical properties

| <u>Appearance</u>                                      |   |
|--|---|
| Physical state   | : Liquid.   |
| Color  | : Various   |
| Odor   | : Characteristic.                                   |
| Odor threshold   | : Not available.                                    |
| рН   | : Not applicable.                                   |
| Melting/freezing point                                 | : Not available.                                    |
| Boiling point, Initial boiling point and boiling range | : Not available.                                    |
| Flash point  | : Closed cup: -20°C (-4°F)                          |
| Evaporation rate                                       | : Not available.                                    |
| Flammability   | : Not available.                                    |
| Lower and upper explosion limit/flammability limit     | : Lower: 1%<br>Upper: 12.8%                         |
| Vapor pressure   | : 101.3 kPa (760 mm Hg)                             |
| Relative vapor density                                 | : Not available.                                    |
| Density  | : 0.824326918 g/cm <sup>3</sup>                     |
| Solubility   | : Not available.                                    |
| Partition coefficient: n-<br>octanol/water             | : Not applicable.                                   |
| Auto-ignition temperature                              | : Not available.                                    |
| Decomposition temperature                              | : Not available.                                    |
| Viscosity  | : Kinematic (40°C (104°F)): <20.5 mm²/s (<20.5 cSt) |
| <u>Aerosol product</u>                                 |   |
| Type of aerosol  | : Spray   |
| Heat of combustion                                     | : 24.754 kJ/g                                       |
|  |   |

## Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame).   |
| Incompatible materials             | : No specific data.  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

## Section 11. Toxicological information

| ** Data of Mixture **                             |  |
|---|--|
| Information on the likely :<br>routes of exposure | Not available.   |
| Potential acute health effects                    |  |
| Eye contact :                                     | Causes serious eye irritation.   |
| Inhalation  | No known significant effects or critical hazards.  |
| Skin contact                                      | Causes skin irritation.  |
| Ingestion   | No known significant effects or critical hazards.  |
| Symptoms related to the physi                     | cal, chemical and toxicological characteristics  |
| Eye contact :                                     | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |
| Inhalation  | Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing  |
| Skin contact :                                    | Adverse symptoms may include the following:<br>irritation<br>redness                     |
| Ingestion :                                       | No specific data.  |
| Potential chronic health effects                  | 2  |
| General   | May cause damage to organs through prolonged or repeated exposure.                       |
| Carcinogenicity                                   | No known significant effects or critical hazards.  |
| Mutagenicity                                      | No known significant effects or critical hazards.  |
| Teratogenicity :                                  | No known significant effects or critical hazards.  |
| Developmental effects                             | No known significant effects or critical hazards.  |
| Fertility effects                                 | No known significant effects or critical hazards.  |
| Numerical measures of toxicity                    | 1  |

### Notice to reader

It is recommended that each customer or recipient of this Safety Data Sheet (SDS) study it carefully and consult resources, as necessary or appropriate, to become aware of and understand the data contained in this SDS and any hazards associated with the product. This information is provided in good faith and believed to be accurate as of the effective date herein. However, no warranty, express or implied, is given. The information presented here applies only to the product as shipped. The addition of any material can change the composition, hazards and risks of the product. Products shall not be repackaged, modified, or tinted except as specifically instructed by Sherwin-Williams, including but not limited to the incorporation of non Sherwin-Williams products or the use or addition of products in proportions not specified by Sherwin-Williams. Regulatory requirements are subject to change and may differ between various locations and jurisdictions. The customer/buyer/user is responsible to ensure that his activities comply with all country, federal, state, provincial or local laws. The conditions for use of the product are not under the control of the manufacturer; the customer/buyer/user is responsible to determine the conditions necessary for the safe use of this product. The customer/buyer/user should not use the product for any purpose other than the purpose shown in the applicable section of this SDS without first referring to the supplier and obtaining written handling instructions. Due to the proliferation of sources for information such as manufacturer-specific SDS, the manufacturer cannot be responsible for SDSs obtained from any other source.
