PRODUCT HAZARDS AND SAFETY INFORMATION:

See Material Safety Data Sheet for complete Health and Safety information.

ADDITIONAL DATA:

For optimum adhesion and application performance, ensure that the temperature and relative humidity are between 15-25°C and 40-60% respectively, at the time of application and for four hours afterward. Before painting a texture ceiling, test for water sensitivity. Many texture ceilings are water-soluble and require a coat of an alkyd paint to stabilize the substrate. If a textured ceiling is water-soluble, use a Alkyd Calcimine Recoater.
