# **SAFETY DATA SHEET**

S00353000

### Section 1. Identification

| Product name                                 | : MR™353 Foaming Citrus Mold Cleaner Aerosol   |
|--|--|
| Product code                                 | : S00353000  |
| Other means of<br>identification             | : Not available.   |
| Product type                                 | : Aerosol.   |
| Relevant identified uses of the              | ne substance or mixture and uses advised against   |
| Paint or paint related material.             |  |
| Manufacturer                                 | : Sprayon Products Group<br>101 W. Prospect Avenue,<br>Cleveland, Ohio 44115                                       |
| Emergency telephone<br>number of the company | : US / Canada: (800) 424-9300<br>Mexico: SETIQ 800-00-214-00 / 55-5559-1588 Available 24 hours and 365 days a year |
| Product Information<br>Telephone Number      | : US / Canada: (800) 247-3266<br>Mexico: Not Available   |
| Transportation Emergency<br>Telephone Number | : US / Canada: (800) 424-9300<br>Mexico: SETIQ 800-00-214-00 / 55-5559-1588 Available 24 hours and 365 days a year |

### Section 2. Hazards identification

| OSHA/HCS status          | : This material is considered hazardous by the OSHA Hazard Communication Standard   |
|--------------------------|---|
| USHA/HUS Status          | (29 CFR 1910.1200).   |
| Classification of the    | : SKIN CORROSION/IRRITATION - Category 2  |
| substance or mixture     | SKIN SENSITIZATION - Category 1<br>ASPIRATION HAZARD - Category 1   |
|                          | Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 1.9% (oral), 4.9% (dermal), 19.9% (inhalation) |
| GHS label elements       |   |
| Hazard pictograms        |   |
|                          |   |
| Signal word              | : Danger  |
| Hazard statements        | : May be fatal if swallowed and enters airways.   |
|                          | Causes skin irritation.   |
|                          | May cause an allergic skin reaction.  |
| Precautionary statements |   |
| Prevention               | : Wear protective gloves. Avoid breathing dust or mist. Wash thoroughly after handling.   |
|                          | Contaminated work clothing must not be allowed out of the workplace.  |
|                          |   |

1/15

### Section 2. Hazards identification

| Response                         | : IF SWALLOWED: Immediately call a POISON CENTER or doctor. Do NOT induce vomiting. Take off contaminated clothing and wash it before reuse. Wash contaminated clothing before reuse. IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice or attention.   |
|----------------------------------|--|
| Storage                          | : Store locked up.   |
| Disposal                         | : Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Supplemental label<br>elements   | DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE. Contains solvents which<br>can cause permanent brain and nervous system damage. Intentional misuse by<br>deliberately concentrating and inhaling the contents can be harmful or fatal. WARNING:<br>This product contains chemicals known to the State of California to cause cancer and<br>birth defects or other reproductive harm. FOR INDUSTRIAL USE ONLY. |
|                                  | Please refer to the SDS for additional information. Keep out of reach of children. Keep upright in a cool, dry place. Do not discard empty can in trash compactor.   |
| Hazards not otherwise classified | : None known.  |

### Section 3. Composition/information on ingredients

| Substance/mixture             | : Mixture        |
|-------------------------------|------------------|
| Other means of identification | : Not available. |
|                               |                  |

#### CAS number/other identifiers

| Ingredient name | % by weight | CAS number |
|-----------------|-------------|------------|
| d-Limonene      | ≥10 - ≤25   | 5989-27-5  |
| Butane          | ≤5          | 106-97-8   |
| 2-Propanol      | <5          | 67-63-0    |
| 2-Butoxyethanol | <5          | 111-76-2   |
| Propane         | ≤3          | 74-98-6    |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### **Description of necessary first aid measures**

| Eye contact  | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
|--------------|--|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
| Skin contact | : Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.  |

| Date of issue/Date | of revision         | : 1/23/2024    | Date of previous issue | : 9/15/2023 | Version | :16       | 2/15 |
|--------------------|---------------------|----------------|------------------------|-------------|---------|-----------|------|
| S00353000          | MR™353 Foaming Citr | us Mold Cleane | r Aerosol              |             | SHW-85- | NA-GHS-US |      |

### Section 4. First aid measures

| Ingestion                   | : Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Aspiration hazard if swallowed. Can enter lungs and cause damage. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. |
|-----------------------------|---|
| Most important symptoms/    | effects, acute and delayed  |
| Potential acute health effe |   |
| Eye contact                 | : No known significant effects or critical hazards.   |
| Inhalation                  | : No known significant effects or critical hazards.   |
| Skin contact                | : Causes skin irritation. May cause an allergic skin reaction.  |
| Ingestion                   | : May be fatal if swallowed and enters airways.   |
| Over-exposure signs/sym     | <u>ptoms</u>  |
| Eye contact                 | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                  | : Adverse symptoms may include the following:   |
| Skin contact                | : Adverse symptoms may include the following:<br>irritation<br>redness  |
| Ingestion                   | : Adverse symptoms may include the following:<br>nausea or vomiting   |
| Indication of immediate me  | dical attention and special treatment needed, if necessary  |
| Notes to physician          | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments         | : No specific treatment.  |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.   |

### See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Extinguishing media                        |  |
|--|--|
| Suitable extinguishing media               | : Use an extinguishing agent suitable for the surrounding fire.  |
| Unsuitable extinguishing media             | : None known.  |
| Specific hazards arising from the chemical | : In a fire or if heated, a pressure increase will occur and the container may burst.<br>Bursting aerosol containers may be propelled from a fire at high speed. |

| Date of issue/Date | e of revision      | : 1/23/2024     | Date of previous issue | : 9/15/2023 | Version | :16       | 3/15 |
|--------------------|--------------------|-----------------|------------------------|-------------|---------|-----------|------|
| S00353000          | MR™353 Foaming Cit | rus Mold Cleane | er Aerosol             |             | SHW-85- | NA-GHS-US |      |

### Section 5. Fire-fighting measures

| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide   |
|--|--|
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

### Section 6. Accidental release measures

| Personal precautions, protec   | tiv | e equipment and emergency procedures  |
|--------------------------------|-----|---|
| For non-emergency<br>personnel | •   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. In the case of aerosols being ruptured, care should be taken due to the rapid<br>escape of the pressurized contents and propellant. If a large number of containers are<br>ruptured, treat as a bulk material spillage according to the instructions in the clean-up<br>section. Do not touch or walk through spilled material. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders       | :   | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).   |
| Methods and materials for co   | nt  | ainment and cleaning up   |
| Small spill                    | :   | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Lorgo opill                    |     | Stan look if without rick. Move containers from spill area. Approach release from   |

Large spill : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

### Section 7. Handling and storage

### Precautions for safe handling

**Protective measures** 

: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50°C. Do not pierce or burn, even after use. Do not get in eyes or on skin or clothing. Do not swallow. Avoid breathing gas. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Empty containers retain product residue and can be hazardous.

### Section 7. Handling and storage

| Advice on general<br>occupational hygiene                          | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |
|--|---|
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

### Section 8. Exposure controls/personal protection

#### Control parameters

Occupational exposure limits (OSHA United States)

| Ingredient name | CAS #     | Exposure limits   |
|-----------------|-----------|---|
| d-Limonene      | 5989-27-5 | OARS WEEL (United States, 4/2022).<br>TWA: 30 ppm 8 hours.  |
| Butane          | 106-97-8  | NIOSH REL (United States, 10/2020).<br>TWA: 800 ppm 10 hours.<br>TWA: 1900 mg/m <sup>3</sup> 10 hours.<br>ACGIH TLV (United States, 1/2023).<br>[Butane isomers] Explosive potential.<br>STEL: 1000 ppm 15 minutes.   |

| ate of issue/Date of revision | : 1/23/2024 | Date of previous issue   | : 9/15/2023 Version : 16 7/   |  |

### Section 8. Exposure controls/personal protection

| Appropriate engineering controls | : Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor<br>or mist, use process enclosures, local exhaust ventilation or other engineering controls<br>to keep worker exposure to airborne contaminants below any recommended or statutory<br>limits.  |
|----------------------------------|--|
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |
| Individual protection measu      | <u>ires</u>  |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.   |
| Skin protection                  |  |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. |
| Body protection                  | <ul> <li>Personal protective equipment for the body should be selected based on the task being<br/>performed and the risks involved and should be approved by a specialist before<br/>handling this product.</li> </ul>  |
| Other skin protection            | <ul> <li>Appropriate footwear and any additional skin protection measures should be selected<br/>based on the task being performed and the risks involved and should be approved by a<br/>specialist before handling this product.</li> </ul>  |
| Respiratory protection           | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.   |
|                                  |  |

## Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

### Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.

Hazardous Material Information System (U.S.A.)

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

#### Notice to reader

It is recommended that each customer or recipient of this Safety Data Sheet (SDS) study it carefully and consult resources, as necessary or appropriate, to become aware of and understand the data contained in this SDS and any hazards associated with the product. This information is provided in good faith and believed to be accurate as of the effective date herein. However, no warranty, express or implied, is given. The information presented here applies only to the product as shipped. The addition of any material can change the composition, hazards and risks of the product. Products shall not be repackaged, modified, or tinted except as specifically instructed by the manufacturer, including but not limited to the incorporation of products not specified by the manufacturer, or the use or addition of products in proportions not specified by the manufacturer. Regulatory requirements are subject to change and may differ between various locations and jurisdictions. The customer/buyer/user is responsible to ensure that his activities comply with all country, federal, state, provincial or local laws. The conditions for use of the product are not under the control of the manufacturer; the customer/buyer/user is responsible to determine the conditions necessary for the safe use of this product. The customer/buyer/user should not use the product for any purpose other than the purpose shown in the applicable section of this SDS without first referring to the supplier and obtaining written handling instructions. Due to the proliferation of sources for information such as manufacturer-specific SDS, the manufacturer cannot be responsible for SDSs obtained from any other source.
