## TECHNICAL INFORMATION

**POWDURA® EPOXY POWDER COATING**

MIL-PRF-32348, Type II, Class I

---

**EWS8-90004**  
**White 17925**  

**POWDURA® Epoxy Powder Coating** is recommended for a broad range of interior functional and decorative applications.

**THIS POWDER COATING CONFORMS TO MIL-PRF-32348, TYPE II, CLASS I, AND HAS BEEN APPROVED BY THE ARMY RESEARCH LAB (artl) ABERDEEN PROVING GROUNDS, ABERDEEN MD- Q2047.**

### APPLICATION

<table>
<thead>
<tr>
<th>Cure Schedule:</th>
<th>10 min. at 400°F</th>
</tr>
</thead>
<tbody>
<tr>
<td>Film Thickness Range:</td>
<td>1.8–2.5 mils</td>
</tr>
</tbody>
</table>

### ATTRIBUTES

- **Specific Gravity:** 1.76 +/- .05  
- **Coverage at 1.0 Mil:** 110 sq. ft./lb.  
- **60° Gloss:** ≥ 90 (ASTM D-523)  
- **Adhesion:** 5B (ASTM D-3359)  
- **Flexibility:** Pass 1/8 " Mandrel Bend (ASTM D-522)  
- **Pencil Hardness:** 2H-3H (ASTM D-3363)  
- **Impact Resistance:** 140 in-lbs direct (ASTM D-2794)  
- **Impact Resistance:** 140 in-lb reverse

### Other Notes:

**Storage:** Powdura® Powder Coatings should be kept in a dry and cool area at temperatures below 80°F (27° C). Shelf life is approximately 12 months. When not in use, store powder in sealed containers: fine powders are hygroscopic.

**Substrate Preparation:** Steel: Surface must be clean and free of grease, dirt, oil, rust, fingerprints, and other contaminants to ensure optimum adhesion and performance properties. Chemical pretreatment, (TT-C-490 type I) zinc phosphate gives best adhesion and performance results. Where blasting is appropriate, blast in accordance with SSPC-SP10 or SSPC-SP5. For optimum adhesions, pretreat blasted surfaces.

 Aluminum: Clean with acidic cleaner or other appropriate cleaner, depending on contamination. Pretreat with MIL-DTL-5514 or anodize per MIL-A-8625.

 Galvanized and other metals - Clean and remove oxidation contamination on surface followed by treatment. Due to the variability in these surfaces, testing adhesion on each situation is recommended.

**NOTE:** See MIL-DTL-53072 for details.

### Testing:

Due to the wide variety of substrates, surface preparation methods, application methods, and environments, the customer should test the complete system for adhesion and compatibility prior to full-scale application. The properties listed are typical and should not be construed as the actual specification.

### CAUTIONS

**First Aid:** If on SKIN: Wash thoroughly with soap and water.

If in EYES: Flush with water immediately and procure medical attention. The area adjacent to the coating operation should be properly ventilated. Cure ovens must be exhausted to the outside atmosphere. All dusts are respiratory irritants; inhalation of the dust should be avoided. To avoid static electricity build-up, properly ground all equipment. Provide dust collection equipment with adequate explosion venting; dust clouds of any finely divided organic material can be ignited by open flame or electrical sparks.

**DO NOT TAKE INTERNALLY.**

**KEEP OUT OF REACH OF CHILDREN.**

**FOR INDUSTRIAL USE ONLY.**

**REFER TO MATERIAL SAFETY DATA SHEET FOR ADDITIONAL INFORMATION.**

**Note:** Product Data Sheets are periodically updated to reflect new information relating to the product. It is important that the customer obtain the most recent Product Data Sheet for the product being used. The information, rating and opinions stated above pertain to the material currently offered and represent the results of tests believed to be reliable. However, due to variations in customer handling and methods of application, which are not known, or under our control, The Sherwin-Williams Company cannot make any warranties or guaranties as to the end results.
