Duration Home®
Interior Latex Matte
A96 Series

**CHARACTERISTICS**

Duration Home® Interior Latex with Moisture Resistant Technology™ offering quick return to service & durability in moist environments like bathrooms.

Also provides:
- Long lasting beauty
- Washability
- Resistant to stains, scuffs & burning
- Anti-Microbial*

**Color:**
Most Colors
To optimize hide and color development, always use the recommended P-Shadow primer.

**Coverage:**
350-400 sq. ft. per gallon @ 4 mils wet, 1.6 mils dry

**Drying Time, @ 77°F, 50% RH:**
- Touch: 1 Hour
- Recoat: 4 Hours
Drying and recoat times are temperature, humidity, and film thickness dependent.

**Finish:**
2-7 units @ 85°

**Tinting with CCE only:**

**Extra White A96W01251**
(may vary by color)

V.O.C.(less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

**Volume Solids:**
39 ±2%

**Weight Solids:**
52 ±2%

**Weight per Gallon:**
10.77 lbs

**Flash Point:**
N.A.

**Vehicle Type:**
Styrene Acrylic

**Shelf Life:**
36 months, unopened

**APPLICATION**

Apply at temperatures above 50°F. No reduction needed.

**Brush:**
Use a nylon-polyester brush.

**Roller:**
Use a high-quality polyester roller cover.

For best final appearance when rolling, finish off in one direction, especially for dark colors.

For specific brushes and rollers, please refer to our Brush and Roller Guide.

**Spray - Airless:**
Pressure: 2000 p.s.i.
Tip: .015-.019 inch

**APPLICATION TIPS**

For touching-up, reduce the product by one pint per gallon.

To assure maximum washability and durability, wait at least 14 days before washing Duration Home coating.

When removing stains, dirt, and marks, use a soft cloth or sponge with water. Stubborn stains may require the use of a general-purpose household cleaner of total removal. Do not use an abrasive cleaner or scrub brush to remove stains.

Surfactant leaching is a term used when a concentration of water-soluble paint ingredients called "surfactants" are noticed on the surface of a latex paint film. Surfactant leaching is most commonly seen as a streak or stain of tan, brown, or clear spots that sometimes can be glossy, soapy, oily or even sticky. Surfactants are soap-like materials that help in the dispersion of the paint's pigment and latex binders.

Duration Home with Moisture Resistant Technology has excellent resistance to surfactant leaching when applied on new or existing substrates. However, surfactants can remain on existing painted surfaces if not removed prior to coating. Existing painted surfaces must be thoroughly washed clean and allowed to dry prior to apply any finish.

**COMPLIANCE**

As of 09/19/2023, Complies with:

- OTC
- OTC Phase II
- S.C.A.Q.M.D.
- CARB
- CARB SCM 2007
- CARB SCM 2020
- Canada
- LEED® v4 & v4.1 Emissions
- LEED® v4 & v4.1 V.O.C.
- EPD-NSF® Certified
- MIR-Manufacturer Inventory
- MPI®

**SPECIFICATIONS**

Duration Home Interior Latex can be used directly over existing coatings, bare drywall, or plaster (cured with a pH of less than 9).

**Block:**
1 coat Loxon Acrylic Block Surfacer
2 coats of Duration Home Interior Latex

**Drywall:**
Self-prime using 2 coats of Duration Home Interior Latex
1 coat Premium Wall & Wood Primer
2 coats Duration Home Interior Latex

**Masonry:**
1 coat Loxon Concrete & Masonry Primer
2 coats Duration Home Interior Latex

**Plaster:**
Self-prime using 2 coats of Duration Home Interior Latex
1 coat Loxon Concrete & Masonry Primer
2 coats Duration Home Interior Latex

**Wood:**
1 coat Premium Wall & Wood Primer
2 coats Duration Home Interior Latex

If the wood has bleeding (such as tannin or knot-holes), prime with Multi-Purpose Primer.

Other primers may be appropriate.

When repainting involves a drastic color change, or coating over heavily stained areas, a coat of primer will improve the hiding performance of the topcoat color.
### SURFACE PREPARATION

| WARNING! If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH-approved respirator to control lead exposure. | Mildew: Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised. | CAUTIONS

For interior use only. Protect from freezing. Non-Photochemically reactive.

Before using, carefully read CAUTIONS on label.

CRystalline silica Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (NIOSH approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (NIOSH approved). Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. FIRST AID: In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE. Ablarding or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN. |

**CLEANUP INFORMATION**

Clean spills, spatters, hands and tools immediately after use with soap and warm clean water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer's safety recommendations when using solvents.

---

### SURFACE PREPARATION

- **Caulking:** Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.
- **Drywall:** Fill cracks and holes with patching paste-spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.
- **Masonry, Concrete, Cement, Block:** All new surfaces must be cured according to the supplier’s recommendations – usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

### Mildew

- **Mildew:** Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

### Wood

- **Wood:** Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.
