ProMar® 400
Zero V.O.C. Interior Latex Primer
B28W04600 White

CHARACTERISTICS
ProMar 400 Zero V.O.C. Interior Latex Primer is a professional quality, interior vinyl acrylic primer.

This primer has been designed for use with the ProMar 400 Zero V.O.C. Interior Latex topcoats providing a complete system.

For use on these interior surfaces:
- Drywall
- Previously painted surfaces

Color: White
For best topcoat color development, use the recommended “P”-shade primer. Check color before use.

Coverage: 400 sq.ft. per gallon @ 4.0 mils wet; 1.1 mils dry
Drying and recoat times are temperature, humidity, and film thickness dependent

Drying Time, @ 77°F, 50% RH:
- Touch: 1 hour
- Recoat: 4 hour
- Finish: 0-5 units @85°

Tinting: Requires ColorCast Ecotoner for tinting.
For best topcoat color development, use the recommended “P”-shade primer. If desired, up to 4 oz per gallon of ColorCast Ecotoner can be used to approximate the topcoat color. Check color before use.

COMPLIANCE
As of 08/05/2020, Complies with:
- OTC Yes
- OTC Phase II Yes
- SCAQMD Yes
- CARB Yes
- CARB SCM 2007 Yes
- Canada Yes
- LEED® v4 & v4.1 Emissions Yes
- LEED® v4 & v4.1 V.O.C. Yes
- EPD-NSF® Certified Yes
- MIR-Manufacturer Inventory Yes
- MPI® No

APPLICATION
No reduction necessary.
Apply at temperatures above 50°F.

Brush:
- Use a nylon-polyester brush

Roller:
- Use a nap synthetic cover,
For specific brushes and rollers, please refer to our Brush and Roller Guide on sherwin-williams.com

Spray—Airless:
- Pressure: 2000 p.s.i.
- Tip: .017-.021 inch

APPLICATION TIPS
When spot priming on some surfaces, a non-uniform appearance of the final coat may result, due to differences in holdout between primed and unprimed areas. To avoid this, prime the entire surface rather than spot priming.

For optimal performance, this primer must be topcoated with a latex, alkyd-oil, water based epoxy, or solvent based epoxy coating on architectural applications.

SPECIFICATIONS

Drywall:
- 1 coat ProMar 400 Zero V.O.C. Latex Primer
- 2 coats Of appropriate finishes

Previously Painted:
- 1 coat ProMar 400 Zero V.O.C. Latex Primer
- 1-2 coats Of appropriate finishes

White B28W04600
V.O.C. (less exempt solvents):
less than 50 grams per litre; .42 lbs. per gallon
As per 40 CFR 59.408

Volume Solids: 29 ± 2%
Weight Solids: 43 ± 2%
Weight per Gallon: 10.39 lbs
Flash Point: N.A.
Vehicle Type: Vinyl acrylic
Shelf Life: 36 months unopened
WVP Perms (US):
52.95 perm grains/(hr ft2 in Hg)
SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking - Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall - Fill cracks and nail holes with patching paste-spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

SURFACE PREPARATION

Mildew - Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach-water solution.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.
Not for use under wallpaper.

Before using, carefully read CAUTIONS on label

CRYSTALLINE SILICA: Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (NIOSH approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (NIOSH approved). Follow respirator manufacturer’s directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. FIRST AID: In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately.

DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE. Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.
