Scuff Tuff™
Interior Waterbased Enamel Semi-Gloss
S26-50 Series

CHARACTERISTICS

Scuff Tuff™ Interior Waterbased Enamel
Semi-Gloss For applications that require
greater durability and abrasion resistance
than standard architectural coatings, Scuff
Tuff is tough enough to handle it.
Formulated to withstand the abuse common
to many interior applications, the super
durable finish resists scuffs and scratches
and minimizes burnishing despite frequent
washing.
Scuff Tuff Interior Waterbased Enamel is
for Residential, Commercial, Healthcare or
Light Industrial projects that require greater
durability and abrasion resistance. Use on
properly prepared Metals, Drywall, Wood,
Cured Plaster, Concrete and Masonry and
previously painted surfaces.

Color: Many Colors
To optimize hide and color development, always use the
recommended P-Shade primer.

Coverage: 350-400 sq. ft. per gallon
@ 4 mils wet, 1.2 mils dry

Drying Time, @ 77°F, (25°C) 50% RH:
Touch: 2 Hours
Recoat: 4 Hours
Drying and recoat times are temperature, humidity, and
film thickness dependent.

Finish: 25-35 units @ 60°

Tinting with CCE only:
Base: oz. per gallon: Strength:
Extra White 0-6 SherColor

Extra White S26W00051
(may vary by color)
V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 30 ±2%
Weight Solids: 47 ±2%
Weight per Gallon: 10.71 lbs
(4.85 kg)
Flash Point: N.A.
Vehicle Type: Cross-linking Proprietary Polymer
Shelf Life: 36 months, unopened

COMPLIANCE

As of 05/13/2022, Compiles with:

OTC Yes
OTC Phase II Yes
S.C.A.Q.M.D. Yes
CARB Yes
CARB SCM 2007 Yes
CARB SCM 2020 Yes
Canada Yes
LEED® v4 & v4.1 Emissions Yes
LEED® v4 & v4.1 V.O.C. Yes
EPD-NSF® Certified No
MIR-Manufacturer Inventory No
MPI® Yes

SPECIFICATIONS

Aluminum, Galvanized & Steel:
1 coat All Surface Enamel Latex Primer
2 coats Scuff Tuff Interior Enamel

Block:
1 coat Loxon Acrylic Block Surfacer
2 coats Scuff Tuff Interior Enamel

Drywall:
1 coat ProMar 200 Zero V.O.C. Primer
2 coats Scuff Tuff Interior Enamel

Masonry, Cement:
1 coat Loxon Concrete and Masonry Primer
2 coats Scuff Tuff Interior Enamel

Plaster:
1 coat Loxon Premium Wall & Wood Primer
2 coats Scuff Tuff Interior Enamel

Wood:
1 coat Premium Wall & Wood Primer
2 coats Scuff Tuff Interior Enamel

Other primers may be appropriate.

APPLICATION

Apply at temperatures above 50°F (10°C).
No reduction needed.

Brush:
Use a nylon-polyester brush.

Roller:
Use a 1/4 to 1/2 inch nap woven cover.
For specific brushes and rollers, please refer
to our Brush and Roller Guide.

Spray - Airless:
Pressure 2000 p.s.i.
Tip .013-.017 inch

APPLICATION TIPS

Make sure product is completely agitated
(mechnically or manually) before use.

Priming and application of two coats at the
recommended film thickness can help where
hiding of a previous coating or application to
new drywall is a factor.

When repainting involves a drastic color
change, or coating over heavily stained areas,
a coat of primer will improve the hiding
performance of the topcoat color.

For best final appearance the use of quality
brush and rollers is required.
Surfacing Preparation

Scuff Tuff™
Interior Waterbased Enamel Semi-Gloss

**Surface Preparation**

**WARNING!** If you scrape, sand or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH-approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting: US - National Lead Information Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead; Canada - your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

**Aluminum and Galvanized Steel:**
Wash to remove any oil, grease, or other surface contamination. All corrosion must be removed with sandpaper, wire brush, or other abrading method.

**Caulking:**
Gaps between walls, ceiling, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

**Drywall:**
Fill cracks and holes with patching paste-spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

**Masonry, Concrete, Cement, Block:**
All new surfaces must be cured according to the supplier’s recommendations – usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

**Glazing:**
Fill cracks and holes with patching paste-spackle and sand smooth. Apply the solution and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

**Steel:**
Rust and mill scale must be removed using sandpaper, wire brush, other abrading method. Bare Steel must be primed the same day as cleaned.

**Plaster:**
Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of clean water. Repeat until the surface is hard, rinse with clean water and allow to dry.

**Wood:**
Clean the surface thoroughly then sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth. All patched areas must be primed. Knots and some woods, such as redwood and cedar, contain a high amount of tannin, a colored wood extract. If applied to these bare woods, it may show some staining. If staining persists, spot prime severe areas with 1 coat of Multi-Purpose Oil-Based Primer.

**CAUTIONS**

For interior use only. Protect from freezing. Non-Photochemically reactive.

Before using, carefully read **CAUTIONS on label.**

**CLEANUP INFORMATION**

Clean spills, spatters, hands and tools immediately after use with soap and warm clean water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer’s safety recommendations when using solvents.
