White Lightning® Flame Buster Intumescent Silicone Sealant is a single-component, neutral cure sealant that is designed to resist the spread of fire, smoke and toxic gases, expand at temperatures over 300 °F and rapidly fill the void left by collapsed materials. It also seals combustible service penetrations through fire- and smoke-rated walls and floor separations. Flame Buster Intumescent Silicone Sealant is most commonly used on static/non-static pipes and conduits, chlorinated polyvinyl/chloride (CPVC) sprinkler pipes and cross-linked polyethylene process and supply tubing.
