SHER-WOOD® Kem Aqua® Plus White

Gloss White ......................... M64W521
Mid Gloss White .................. M64W522
Low Gloss White ................. M64W523
Custom Blend ..................... M64PX Series

DESCRIPTION

SHER-WOOD® KEM AQUA® PLUS WHITE is a high quality water reducible pigmented white for finishing furniture, cabinets, and a wide variety of wood and novelty items. This high quality topcoat provides excellent appearance and performance over Sher-Wood® Kem Aqua® Plus Surfacer.

Advantages:
- Meets Kitchen Cabinet Manufacturers Association (KCMA) over Sher-Wood® Kem Aqua® Plus Surfacer.
- VOC as packaged <2.08 lb/gal, 250 g/L*
- Very good resistance to yellowing.
- Excellent hardness, block resistance and print resistance.
- Excellent mar resistance.
- Good flow and leveling.
- Better resistance to microfoaming than other latex coatings.
- Good flexibility – passes 20 KCMA Cold Check cycles.

CHARACTERISTICS

Gloss:  Gloss 70+ units
Mid Gloss 45-50 units
Low Gloss 20-25 units

Volume Solids:  31.0 ± 1%
Weight Solids:  42.0 ± 1%

Viscosity:  18-22 seconds #3 Zahn Cup

Recommended film thickness:
Mils Wet 3.0 - 4.0
Mils Dry 1.0 - 1.25

Spreading Rate (no application loss)
385-515 sq ft/gal @ 1.0-1.25 mils DFT

Drying (77°F, 50% RH):
To Touch: 15 minutes
To Handle: 20 minutes
To Sand: 22-25 minutes
To Recoat: 25 minutes
To Pack: 8-12 hours
Force Dry: 10-20 minutes at 120°F

This product dries primarily by water evaporation. Best drying occurs at 50% RH or lower and temperatures of 77°F or higher. Good air movement is essential for complete drying.

When humid shop conditions exist, lower relative humidity is achieved only by raising the temperature 10-30°F and ventilating out the excess moisture.

Flash Point: None

Package Life: 1 year, unopened, inside storage

Freeze/Thaw: 0 cycles

Air Quality Data:
- Non-photochemically reactive
- Volatile Organic Compounds (VOC): Theoretical as packaged, less water and exempt solvents <2.08 lb/gal, 250 g/L
- Volatile Hazardous Air Pollutants (VHAPS): as packaged, no reportable VHAPS

An Environmental Data Sheet is available from your local Sherwin-Williams facility.

SPECIFICATIONS

Wood (interior only): Must be clean, dry, and finish sanded. Substrate should be free of grease, oil, dirt, fingerprints, and any contamination to ensure optimum adhesion and coating performance properties. Moisture content of wood should be 6 to 8%.

Wood Finishing System:
1. Seal—apply Sher-Wood Kem Aqua Plus Surfacer (E64W520) at 4.0-5.0 mils wet. Air dry with good air movement. Sand with 240 grit paper and remove all sanding dust.
3. Sher-Wood® Kem Aqua® Plus Clear (T75C555 series) can also be used as a final coat for additional performance properties.
4. Maximum dry film thickness of the system must not exceed 4 mils dry.

NOTE: Do not use Kem Aqua® Clear Lacquer over Kem Aqua® Plus Surfacer or Kem Aqua® Plus White. These systems are not compatible and will discolor. Kem Aqua® Plus Clear can be used as a final coat over Kem Aqua® Plus White.

Testing: Due to the wide variety of substrates, surface preparation methods, application methods, and environments, the customer should test the complete system for adhesion, compatibility and performance prior to full scale application.

*VOC compliance limits vary from state to state; please consult local Air Quality rules and regulations.

**CC-F65 05/14 continued on back**
### ADDITIONAL INFORMATION

- Not recommended for exterior use.  
- Use stainless steel spray equipment.  
- Tank, piping and containers should be lined steel or plastic.  
- Mix thoroughly prior to use.  Avoid vigorous agitation, which may cause bubbling or foaming.  
- Must not be exposed to freezing temperatures.  Store inside.  
- The customer is urged to pretest the system under shop conditions.  
- Excessive wet film thickness (>4.0 mils wet) may sag.  
- Maximum dry film thickness of coating system is 4.0 mils.  
- Very low humidity may cause mud-cracking and poor film properties.  
- When finishing Redwood, Red or White Oak, Pine and Cedar Wood With water based finishes, tannins may be extracted from the wood by the water and cause staining and/or discoloration.  This tannin bleed is most evident with white topcoats. Sher-Wood Kem Aqua Plus Surfacer E64W520 must be used to prevent tannin discoloration.  
- Products must be air dried at least overnight with good air movement before stacking or packing.  
- Some applications and equipment setups, especially air assisted airless and airless, may be prone to microfoaming of the wet film, which will give lower gloss and clarity.  Do not use higher pressures than needed for atomization.  
- Clean-Up:  
  Flush spray equipment completely with water followed by flushing with a 2:1 blend of water and Butyl Cellosolve to remove water residue and to prevent rusting.  

### CAUTIONS

#### FOR INDUSTRIAL SHOP APPLICATION

Thoroughly review product label and Material Safety Data Sheet (MSDS) for safety and cautions prior to using this product.

A Material Safety Data Sheet is available from your local Sherwin-Williams facility.

Please direct any questions or comments to your local Sherwin-Williams facility.
