F81BUI003 INVERBLACK VERNICE IDROSOL, NERA PER GOMME 94630

## SECTION 3: Composition/information on ingredients

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

## SECTION 4: First aid measures

| 4.1 Description of first aid n | asures                                                                                                                                                                                                |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| General                        | : In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and seek medical advice. |
| Eye contact                    | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the<br/>eyelids apart for at least 10 minutes and seek immediate medical advice.</li> </ul>                       |
| Inhalation                     | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.      |
| Skin contact                   | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>                            |
| Ingestion                      | : If swallowed, seek medical advice immediately and show the container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.                                                             |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.                            |

## 4.2 Most important symptoms and effects, both acute and delayed

There are no data available on the mixture itself. Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eve contact.

### 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.</li> <li>The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul> |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Specific treatments | : No specific treatment.                                                                                                                                                                         |

See toxicological information (Section 11)

| SECTION 5: Firefighting measures  |                                                                                        |  |
|-----------------------------------|----------------------------------------------------------------------------------------|--|
| 5.1 Extinguishing media           |                                                                                        |  |
| Suitable extinguishing<br>media   | : Recommended: alcohol-resistant foam, CO <sub>2</sub> , powders, water spray or mist. |  |
| Unsuitable extinguishing<br>media | : Do not use water jet.                                                                |  |

## **SECTION 5: Firefighting measures**

#### 5.2 Special hazards arising from the substance or mixture

| Hazards from the substance or mixture           | : | Fire will produce dense black smoke. Exposure to decomposition products may cause a health hazard.                      |
|-------------------------------------------------|---|-------------------------------------------------------------------------------------------------------------------------|
| Hazardous combustion<br>products                | : | Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen. |
| 5.3 Advice for firefighters                     |   |                                                                                                                         |
| Special protective actions<br>for fire-fighters | : | Cool closed containers exposed to fire with water. Do not release runoff from fire to drains or watercourses.           |
| Special protective                              | : | Fire-fighters should wear positive pressure self-contained breathing apparatus                                          |

(SCBA) and full turnout gear.

## **SECTION 6: Accidental release measures**

Due to the organic solvents content of the mixture:

equipment for fire-fighters

| 6.1 Personal precautions, pre                            | ote | ective equipment and emergency procedures                                                                                                                                                                                                                                        |
|----------------------------------------------------------|-----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For non-emergency<br>personnel                           | :   | Exclude sources of ignition and ventilate the area. Avoid breathing vapour or mist.<br>Refer to protective measures listed in sections 7 and 8.                                                                                                                                  |
|                                                          |     | Keep unnecessary and unprotected personnel from entering.                                                                                                                                                                                                                        |
| For emergency responders                                 | :   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".                                                                        |
| 6.2 Environmental<br>precautions                         | :   | Do not allow to enter drains or watercourses. If the product contaminates lakes, rivers, or sewers, inform the appropriate authorities in accordance with local regulations.                                                                                                     |
| 6.3 Methods and material for containment and cleaning up | :   | Contain and collect spillage with non-combustible, absorbent material e.g. sand,<br>earth, vermiculite or diatomaceous earth and place in container for disposal<br>according to local regulations (see Section 13). Preferably clean with a detergent.<br>Avoid using solvents. |
| 6.4 Reference to other sections                          | :   | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.                                                                                    |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

| 7.1 Precautions for safe<br>handling | : Due to the organic solvents content of the mixture:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                      | <ul> <li>Prevent the creation of flammable or explosive concentrations of vapours in air and avoid vapour concentrations higher than the occupational exposure limits. In addition, the product should only be used in areas from which all naked lights and other sources of ignition have been excluded. Electrical equipment should be protected to the appropriate standard.</li> <li>Keep away from heat, sparks and flame. No sparking tools should be used. Avoid contact with skin and eyes. Avoid the inhalation of dust, particulates, spray or mist arising from the application of this mixture. Avoid inhalation of dust from sanding.</li> <li>Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed.</li> <li>Put on appropriate personal protective equipment (see Section 8). Never use pressure to empty. Container is not a pressure vessel.</li> <li>Always keep in containers made from the same material as the original one.</li> </ul> |
|                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

Good housekeeping standards, regular safe removal of waste materials and regular maintenance of spray booth filters will minimise the risks of spontaneous combustion and other fire hazards.

Before use of this material please refer to the Exposure Scenario(s) if attached for the specific end use, control measures and additional PPE considerations.

### SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 8.1 Control parameters

### **Occupational exposure limits**

| Product/ingredient name | Exposure limit values                                  |
|-------------------------|--------------------------------------------------------|
| 1-Methoxy-2-propanol    | EH40/2005 WELs (United Kingdom (UK), 1/2020). Absorbed |
|                         | through skin.                                          |
|                         | STEL: 560 mg/m <sup>3</sup> 15 minutes.                |
|                         | STEL: 150 ppm 15 minutes.                              |
|                         | TWA: 375 mg/m <sup>3</sup> 8 hours.                    |
|                         | TWA: 100 ppm 8 hours.                                  |
| 2-Butoxyethanol         | EH40/2005 WELs (United Kingdom (UK), 1/2020). Absorbed |
|                         | through skin.                                          |
|                         | STEL: 50 ppm 15 minutes.                               |
|                         | TWA: 25 ppm 8 hours.                                   |
|                         | STEL: 246 mg/m <sup>3</sup> 15 minutes.                |
|                         | TWA: 123 mg/m <sup>3</sup> 8 hours.                    |
| Dimethylethanol Amine   | EH40/2005 WELs (United Kingdom (UK), 1/2020).          |
|                         | STEL: 22 mg/m <sup>3</sup> 15 minutes.                 |
|                         | STEL: 6 ppm 15 minutes.                                |
|                         | TWA: 2 ppm 8 hours.                                    |
|                         | TWA: 7.4 mg/m <sup>3</sup> 8 hours.                    |

|                         | Plant                     | -                |               |

## 8.2 Exposure controls

| Appropriate engineering<br>controls | : Provide adequate ventilation. Where reasonably practicable, this should be<br>achieved by the use of local exhaust ventilation and good general extraction. If<br>these are not sufficient to maintain concentrations of particulates and solvent<br>vapours below the OEL, suitable respiratory protection must be worn.                                                                       |
|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                     | <ul> <li>Users are advised to consider national Occupational Exposure Limits or other<br/>equivalent values.</li> </ul>                                                                                                                                                                                                                                                                           |
| Individual protection mea           | asures                                                                                                                                                                                                                                                                                                                                                                                            |
| Hygiene measures                    | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location. |
| Eye/face protection                 | : Use safety eyewear designed to protect against splash of liquids.                                                                                                                                                                                                                                                                                                                               |
| Skin protection                     |                                                                                                                                                                                                                                                                                                                                                                                                   |

Sep. 2023 Version : 11 7/26                                                                                                                                                                                                                                                                                                                          |

# **SECTION 8: Exposure controls/personal protection**

| •                               | • •                                                                                                                                                                                                                                                                                                                                      |
|---------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Hand protection                 | : Wear suitable gloves tested to EN374.                                                                                                                                                                                                                                                                                                  |
| Gloves                          | <ul> <li>Gloves for short term exposure/splash protection (less than 10 min.): Nitrile&gt;0.12<br/>mm</li> </ul>                                                                                                                                                                                                                         |
|                                 | Gloves for splash protection need to be changed immediately when in contact with chemicals.                                                                                                                                                                                                                                              |
|                                 | Gloves for repeated or prolonged exposure (breakthrough time>480 min.): Butyl gloves>0.3 mm                                                                                                                                                                                                                                              |
|                                 | Due to many conditions (e.g. temperature, abrasion) the practical usage of a chemical protective glove in practice may be much shorter than the permeation time determined through testing.                                                                                                                                              |
|                                 | The recommendation for the type or types of glove to use when handling this<br>product is based on information from the following source: Solvent resin<br>manufacturers and European Solvents Industry Group (ESIG)                                                                                                                     |
|                                 | There is no one glove material or combination of materials that will give unlimited resistance to any individual or combination of chemicals.                                                                                                                                                                                            |
|                                 | The breakthrough time must be greater than the end use time of the product.<br>The instructions and information provided by the glove manufacturer on use,<br>storage, maintenance and replacement must be followed.                                                                                                                     |
|                                 | Gloves should be replaced regularly and if there is any sign of damage to the glove material.                                                                                                                                                                                                                                            |
|                                 | Always ensure that gloves are free from defects and that they are stored and used correctly.                                                                                                                                                                                                                                             |
|                                 | The performance or effectiveness of the glove may be reduced by physical/chemical damage and poor maintenance.                                                                                                                                                                                                                           |
|                                 | Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred.                                                                                                                                                                                                                   |
|                                 | The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.                                                                                                                |
| Body protection                 | : Personnel should wear protective clothing.                                                                                                                                                                                                                                                                                             |
|                                 | <ul> <li>Personal protective equipment for the body should be selected based on the task<br/>being performed and the risks involved and should be approved by a specialist<br/>before handling this product.</li> </ul>                                                                                                                  |
| Other skin protection           | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>                                                                                            |
| Respiratory protection          | : Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Recommended: A2P2 (EN14387). Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. |
| Environmental exposure controls | : Do not allow to enter drains or watercourses.                                                                                                                                                                                                                                                                                          |

Before use of this material please refer to the Exposure Scenario(s) if attached for the specific end use, control measures and additional PPE considerations. The information contained in this safety data sheet does not constitute the user's own assessment of workplace risks, as required by other health and safety legislation. The provisions of the national health and safety at work regulations apply to the use of this product at work.

## **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

### 9.1 Information on basic physical and chemical properties

| <u>Appearance</u> |   |         |
|-------------------|---|---------|
| Physical state    | : | Liquid. |
| Colour            | : | Black.  |

F81BUI003 INVERBLACK VERNICE IDROSOL. NERA PER GOMM 94630

# **SECTION 10: Stability and reactivity**

10.6 Hazardous decomposition products

: Decomposition products may include the following materials: carbon monoxide, carbon dioxide, smoke, oxides of nitrogen.

## Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees.

## **SECTION 11: Toxicological information**

## 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

There are no data available on the mixture itself. Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

## Acute toxicity

| Product/ingredient name                                                  | Result                 | Species    | Dose        | Exposure |
|--------------------------------------------------------------------------|------------------------|------------|-------------|----------|

|                                |                 |                        |                 | SHW-A4-EU-CLP44-GB |       |

# SECTION 13: Disposal considerations

| Disposal considerations           | <ul> <li>Using information provided in this safety data sheet, advice should be obtained from<br/>the relevant waste authority on the classification of empty containers. Empty<br/>containers must be scrapped or reconditioned. Dispose of containers contaminated<br/>by the product in accordance with local or national legal provisions.</li> </ul> |
|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| European waste<br>catalogue (EWC) | <ul> <li>packaging containing residues of or contaminated by hazardous substances 15 01<br/>10*</li> </ul>                                                                                                                                                                                                                                                |
| Special precautions               | This material and its container must be disposed of in a safe way. Care should be<br>taken when handling emptied containers that have not been cleaned or rinsed out.<br>Empty containers or liners may retain some product residues. Avoid dispersal of<br>spilt material and runoff and contact with soil, waterways, drains and sewers.                |

## **SECTION 14: Transport information**

|                                                 | ADR/RID        | IMDG           | ΙΑΤΑ           |
|-------------------------------------------------|----------------|----------------|----------------|
| 14.1 UN number<br>or ID number                  | Not regulated. | Not regulated. | Not regulated. |
| 14.2 UN proper shipping name                    | -              | -              | -              |
| 14.3 Transport<br>Hazard Class(es)/<br>Label(s) | -              | -              | -              |
| 14.4 Packing<br>group                           | -              | -              | -              |
| 14.5<br>Environmental<br>hazards                | No.            | No.            | No.            |
| Additional information                          | -              | -              | -              |

This mixture is not classified as dangerous according to international transport regulations (ADR/RID, IMDG, ICAO/IATA).

**14.6 Special precautions for : Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

| 14.7 Maritime transport in | : Not applicable. |
|----------------------------|-------------------|
| bulk according to IMO      |                   |
| instruments                |                   |

Multi-modal shipping descriptions are provided for informational purposes and do not consider container sizes. The presence of a shipping description for a particular mode of transport (sea, air, etc.), does not indicate that the product is packaged suitably for that mode of transport. All packaging must be reviewed for suitability prior to shipment, and compliance with the applicable regulations is the sole responsibility of the person offering the product for transport. People loading and unloading dangerous goods must be trained on all of the risks deriving from the substances and on all actions in case of emergency situations.

## **SECTION 15: Regulatory information**

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture <u>EU Regulation (EC) No. 1907/2006 (REACH)</u>

## Annex XIV - List of substances subject to authorisation

### <u>Annex XIV</u>

None of the components are listed.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous

## substances, mixtures and articles

#### Notice to reader

In accordance with Regulation (EC) 1907/2006, REACH Regulation, Articles 31, 37, any required hazard-related information on the use of substances received as downstream user will be sent forward. Consequently, the safety data sheets for some products will contain a SUMI - Safe Use of Mixture Information - attached to the safety data sheet.

SUMI(s) will be added to the SDS for products if both the following conditions are met:

• The product is classified as hazardous for health

• The product contains one or more REACH-registered substances for which extended safety data sheets (exposure scenarios) have been provided

It is recommended that each customer or recipient of this Safety Data Sheet (SDS) study it carefully and consult resources, as necessary or appropriate, to become make themselves aware of and understand the data contained in this SDS and any hazards that may be associated with the product. This information is provided in good faith and believed to be accurate as of the effective date mentioned herein. However, no warranty, express or implied, is given. The information presented here applies only to the product as shipped. The addition of any material can may change later the composition, hazards and risks of the product. Products shall should not be repackaged, modified, or tinted except as specifically instructed by the manufacturer, including but not limited to, the incorporation of products not specified by the manufacturer, or the use or addition of products in proportions not specified by the manufacturer. Regulatory requirements are subject to change and may differ between various locations and jurisdictions. The customer/buyer/user is responsible to ensure that his activities comply with all country, federal, state, provincial or local laws. The conditions for the use of the product are not under the manufacturer's control of the manufacturer; the

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II F81BUI003 INVERBLACK VERNICE IDROSOL. NERA PER GOMME 94630

## **SECTION 16: Other information**

customer/buyer/user is responsible to for determine determining the conditions necessary for the safe use of this product. The customer/buyer/user should not use the product for any purpose other than the purpose shown in the applicable section of this SDS, without first referring to the supplier and obtaining written handling instructions. Due to the proliferation of sources for information such as manufacturer-specific SDS, the manufacturer cannot be held responsible for SDSs obtained from any other source.

# SUMI Safe Use of Mixtures Information for end-users

## Title : Industrial spray painting, no booth

This document is intended to communicate the conditions of safe use for the product and should always be read in combination with the product's Safety Data Sheet, Technical Data sheet and labels.

# General description of the process covered

Paint application on industrial line with no enclosure (only local exhaust ventilation)

# **Operational conditions**

Place of use :

# : Indoor use

# **Risk management measures (RMM)**

# Disclaimer

The information in this Safe Use of Mixture Information sheet is based on the data provided by the substance supplier for the substances in the product for which a chemical safety assessment has been carried out at the time of issue. It does not guarantee safe use of the product and does not replace any occupational risk assessment required by legislation. When developing workplace instructions for employees, SUMI sheets should always be considered in combination with the SDS and the label of the product.

No liability is accepted for any damage, no matter of what kind, which is direct or indirect consequence of acts and/or decisions (partly) based on the contents of this document.

See chapter 8 of this Safety Data Sheet for specifications.

# Disclaimer

The information in this Safe Use of Mixture Information sheet is based on the data provided by the substance supplier for the substances in the product for which a chemical safety assessment has been carried out at the time of issue. It does not guarantee safe use of the product and does not replace any occupational risk assessment required by legislation. When developing workplace instructions for employees, SUMI sheets should always be considered in combination with the SDS and the label of the product.

No liability is accepted for any damage, no matter of what kind, which is direct or indirect consequence of acts and/or decisions (partly) based on the contents of this document.

# SUMI Safe Use of Mixtures Information for end-users

## Title : Industrial spray painting, enclosed

This document is intended to communicate the conditions of safe use for the product and should always be read in combination with the product's Safety Data Sheet, Technical Data sheet and labels.

# General description of the process covered

Paint application on industrial line with fully-enclosed spraying

# **Operational conditions**

Place of use : Indoor use

# **Risk management measures (RMM)**

# Disclaimer

The information in this Safe Use of Mixture Information sheet is based on the data provided by the substance supplier for the substances in the product for which a chemical safety assessment has been carried out at the time of issue. It does not guarantee safe use of the product and does not replace any occupational risk assessment required by legislation. When developing workplace instructions for employees, SUMI sheets should always be considered in combination with the SDS and the label of the product.

No liability is accepted for any damage, no matter of what kind, which is direct or indirect consequence of acts and/or decisions (partly) based on the contents of this document.

# SUMI Safe Use of Mixtures Information for end-users

## Title : Industrial spray painting, walk-in booth

This document is intended to communicate the conditions of safe use for the product and should always be read in combination with the product's Safety Data Sheet, Technical Data sheet and labels.

# General description of the process covered

Paint application on industrial line with walk-in spray booth

# **Operational conditions**

Place of use : Indoor use

# **Risk management measures (RMM)**

# Disclaimer

The information in this Safe Use of Mixture Information sheet is based on the data provided by the substance supplier for the substances in the product for which a chemical safety assessment has been carried out at the time of issue. It does not guarantee safe use of the product and does not replace any occupational risk assessment required by legislation. When developing workplace instructions for employees, SUMI sheets should always be considered in combination with the SDS and the label of the product.

No liability is accepted for any damage, no matter of what kind, which is direct or indirect consequence of acts and/or decisions (partly) based on the contents of this document.
