RESUGRIPTM 500 100% SOLIDS TWO COMPONENT EPOXY FLOOR AND DECK COATING

| PART A GP | 23440A | Series |
|-----------|----------|----------|
| PART B GP | 23440B01 | Hardener |

PRODUCT INFORMATION

| RESUGRIP 500 is a two component, 100% solids epoxy anti-slip Concrete: Remove oil, grease, dirt, or other surface contamin floor and deck coating engineered to offer anti-slip protection in Concrete: Remove oil, grease, dirt, or other surface contamin areas with heavy rolling and pedestrian traffic. Sing a commercial grade cleaner/degreaser. Flush the area ResuGrip 500 is suitable for marine and demanding industrial Is easy to apply and has very little odor which makes it ideal for use in odor sensitive applications such as Vertex in the area with adhesion. Primer required. ResuGrip 500 has excellent chemical resistance to oil, gasolin, cids, caustics, hydraulic fluids and most solvents. All release agents, hardeners or sealers must also be remove they may interfere with adhesion. Primer required. ResuGrip 500 has been formulated to meet the strict requirements of South Coast Air Quality Management District Rule 1113. Metal: All surfaces should be prepared to a minimul commercial grade cleaner/degreaser. Flush the area with water to remove any residues and allow to dry. Strengt and to create a surface Folor: Medium Gray, Black, Tile Red, and Safety Yellow. Custom colors are available and subject to minimum order requirements. Volume Solids: 100%, mixed Volc: <100 g/L; 0.83 lb/gal, mixed Mix Ratio: 1:1 by unit Coefficient of Friction: Dry: 1.1; Wet: 1.0 (ASTM F609) Theoretical Coverage: 35 | minants rea with ny paint, nooth or on. New lication. oved as num s | |
|---|---|--|
| ResuGrip 500 is suitable for marine and demanding industrial environments. It is easy to apply and has very little odor which makes it ideal for use in odor sensitive applications such as wineries, food processing facilities, hospitals, and confined areas. It is designed to adhere to both metal and wood surfaces. Ialtance or loose concrete by scarification or blasting. Smoc glazed surfaces should be cured for at least 30 days prior to application such as self extinguishing properties in its cured state. ResuGrip 500 has excellent chemical resistance to oil, gasoline, acids, caustics, hydraulic fluids and most solvents. Metal: All surfaces must be clean, dry and free of surface contamination. The surface should be prepared to a minimu Commercial Blast per SSPC-SP 6. Prime blasted surfaces immediately to prevent flash rust. ResuGrip 500 has seef extinguishing properties in its cured state. Metal: All surfaces must be clean, dry and free of surface contamination. The surface should be prepared to a minimu Commercial Blast per SSPC-SP 6. Prime blasted surfaces immediately to prevent flash rust. ResuGrip 500 is USDA acceptable. Wood: Remove oil, grease, dirt, or other surface contaminants using a commercial grade cleaner/degreaser. Fe the area with water to remove any residues and allow to dry 3 the surface to remove loose material and to create a surface profile for application. Primer required. Volume Solids: 100%, mixed VoC: <100 g/L; 0.83 lb/gal, mixed | nooth or on. New Ilication. oved as num s | |

| | | |

PRODUCT INFORMATION

| Application Equipment | APPLICATION PROCEDURES |
|---|---|
| Roller: The best anti-slip characteristics are obtained when the | ResuGrip 500 is designed to be applied over a primer or sealer. |
| product is applied by roller. For best results, do not thin and apply using a phenolic core roller on even surfaces. On irregular surfaces use a bristle core roller or short nap roller. To roll, pour a strip of the anti-slip coating approximately 2 inches long and 6 inches wide on the surface being coated. Boll by | Mixing should be done with a mechanical mixer such as a pneumatic drill motor with a Jiffy mixing blade. Premix the base component for several minutes making sure all material is lifted off the bottom and uniformly mixed. Pour the entire contents of the hardener container into the base component. Mix thoroughly as described above for 3-5 minutes until contents |
| pulling the material toward you in slow straight strokes. Roll | are a uniform color. |
| material in one direction only. | Apply at surface temperatures between 40°F (5°C) and 120°F (49°C). Application below 40°F (5°C) is not recommended as material may not cure properly. Protect exterior applications |
| important that the rolled profile expose the maximum amount of | from rain for at least 24 hours. |
| nonslip aggregate. If the aggregate is not properly exposed, the | PERFORMANCE TIPS |
| even without any thick puddles. If the coating is too heavy, it may not cure properly. | Maintain a clean surface to ensure the maximum performance from the anti-slip coating. The following cleaning procedure is recommended: |
| Spray: This coating can be sprayed using Mastic Spray Equipment. Sprayed applications will provide a uniform appearance with good | Foreign matter such as chewing gum should be removed with a scraper or putty knife. |
| anti-slip properties. To spray, use a minimum of a 5 gallon bottom outlet pressure pot | Use an all purpose biodegradable cleaner/degreaser mixed with water to clean the surface. Scrub the surface with a long handled, fiber bristled brush or floor machine. |
| equipped with a double regulator and air driven agitator with a 1" I.D. outlet pipe. | Rinse with clean water and dry. |
| Use a maximum of 25 feet of $3/8$ " hose for air and a maximum of 25 feet of $3/4$ " hose for the material. | Note: While Sherwin-Williams anti-slip coatings are very durable, they are not a permanent coating solution and will require occasional touch up, especially in heavy traffic areas. |
| The spray gun should be equipped with a $1\!\!\!/4"$ fluid nozzle and a $1\!\!\!/4"$ internal air cap. | Safety precautions: This product is intended for professional use in an industrial environment only. Consult the Safety Data Sheet prior to application. |
| Minimum air supply is 20 CFM at 90 lbs. pressure. | |
| Material pressure should be 15-20psi | SAFEIT PRECAUTIONS |
| | Dublished technical data and instructions are subject to shance without notice. |
| Fluid pressure should be 20-25 psi. | Contact your Sherwin-Williams representative for additional technical data and instructions. |
| Maintain constant agitation of the product to insure the aggregate does not settle out during application. | WARRANTY |
| Spray at a distance of 16-24 inches from the surface. | The Sherwin-Williams Company warrants our products to be free of manufactur- ing defects in accord with applicable Sherwin-Williams quality control procedures. Liability for products proven defective, if any, is limited to replacement of the defec- |
| Trowel: ResuGrip 500 may be applied with a smooth trowel such as a flexible plasterer's finishing trowel. Use a trowel of about 4 inches by 12 inches for best results.
