## RESUPRIME<sup>™</sup> 3501 MOISTURE GUARD

Part A Part B GP3501 GP3501B01 Series Hardener

# **PRODUCT INFORMATION**

Product Description	
<b>RESUPRIME 3501 Moisture Guard</b> is a high solids, moisture- tolerant epoxy. It creates a barrier, reducing damaging moisture transmission through concrete substrates to wood flooring. Resuprime 3501 thoroughly wets out the substrate and bonds aggressively to it.	Color: Mix Ratio: Viscosity: Volume Soli
Advantages	
<ul> <li>Helps prevent buckling and delamination of wood flooring</li> <li>Provides excellent bonding surface</li> <li>Spreads easily without skips or voids</li> <li>Proven performance record</li> </ul>	Weight Solic VOC (EPA M
TYPICAL USES	Wet mils (m
<b>RESUPRIME 3501 Moisture Guard</b> can be used to protect parquet, block and other hardwood floors from substrate vapor	~Coverage s Drying
and moisture damage.	
LIMITATIONS	To touch: To recoat:
<ul> <li>Slab on grade requires vapor/moisture barrier</li> <li>Substrate must be structurally sound, dry and free of bond inhibiting contaminants</li> <li>During installation and initial cure cycle substrate and ambient air temperature must be at a minimum of 50°F (10°C). Substrate temperature must be least 5°F (3°C) above the dew point (for lower temperature installation contact your Sherwin-Williams representative).</li> </ul>	Light traffi Full cure: If maximum re Drying time Pot Life:
• When required, adequate ventilation shall be provided and	Shelf Life:
<ul> <li>proper clothing and respirators worn</li> <li>All foodstuffs must be removed from the work area and areas subject to fumes during the installation and initial cure</li> <li>Extinguish all sources of ignition during the entire installation cycle</li> <li>Strictly adhere to published coverage rates</li> </ul>	Flash Poin
Surface Preparation	PEF
Proper inspection and preparation of the substrate to receive	Test Name
resinous material is critical. Read and follow the "Instructions for Concrete Surface Preparation" (Form G-1) for complete details.	Adhesion
Concrete Surface r reparation (r onn G-1) for complete details.	Flammability

PRODUCT CHARACTERISTICS				
Color:	A	Amber		
Mix Ratio:	4	:1		
Viscosity:	2	200-250 cps		
Volume Solids:	8	85% ± 2%, mixed		
Weight Solids:	g	94% ± 2%, mixed		
VOC (EPA Meth	nod 24):	<100 g/L mixed;	0.83 lb/gal	
Recommended Spreading Rate per coat:				
Wet mils (micr ~Coverage sq f		Minimum 4 (100) 250 (6.4)	<b>Maximum</b> <b>6.4</b> (160) <b>400</b> (10.2)	
Drying Schedule @ 6 mils (150) microns) wet:				
	@ 73°F (23°C)			
To touch:	3 hours			
To recoat:	6 hours minimum			
Light traffic:	8 hours minimum			
Full cure:	24 hours			
If maximum recoat time is exceeded, abrade surface before recoating. Drying time is temperature, humidity, and film thickness dependent.				
Pot Life:	50°F (10°C)			
	73°F (23°C)			
	90°F (32°C)			
Shelf Life:				

Flash Point: >250°F (>121°C), ASTM D 93, mixed

### **PERFORMANCE CHARACTERISTICS**

Test Name	Test Method	Results
Adhesion	ACI 503R	300 psi concrete failure
Flammability		Self-extinguishing over concrete

## RESUPRIME<sup>™</sup> 3501 MOISTURE GUARD

Part A Part B GP3501 GP3501B01 Series Hardener

**PRODUCT INFORMATION** 

TINTING

APPLICATION

#### APPLICATION INSTRUCTIONS:

Revised: December 17, 2021

1. Add 4 parts 3501A (resin) to 1 part 3501B (hardener) by volume. Mix with low speed drill and Jiffy blade for three minutes and until uniform. To insure proper system cure and performance, strictly follow the mix ratio.

2. Apply 3501 using a squeegee or trowel and back roll using a 1/4" nap roller at a spread rate of 250-400 square feet per gallon to yield 4-6 mils (100-150 microns) WFT with no puddles making sure of uniform coverage. **Take care not to puddle materials and insure even coverage.** To eliminate roller marks and lines, cross rolling is recommended.

3. Allow to cure 24 hours minimum before opening to traffic.

Note: Epoxy materials will appear to be cured and "dry to touch" prior to full chemical cross linking. Allow epoxy to cure 2-3 days prior to exposure to water or other chemicals for best performance.

### **ORDERING INFORMATION**

Packaging: Part A:

Part B:

Weight:

1 gallon (3.8L) and 4 gallon (15.2L) containers 0.25 gallon (0.95L) and 1 gallon (3.8L) containers 9.8  $\pm$  0.2 lb/gal; 1.20 Kg/L

### **CHEMICAL RESISTANCE**

For comprehensive chemical resistance information, consult the Chemical Resistant Guide and contact your Sherwin-Williams representative.

Do not tint.

#### CLEANUP

Clean up mixing and application equipment immediately after use. Use toluene or xylene. Observe all fire and health precautions when handling or storing solvents.

#### SAFETY

Refer to the SDS sheet before use.

Published technical data and instructions are subject to change without notice. Contact your Sherwin-Williams representative for additional technical data and instructions.

### MAINTENANCE

Occasional inspection of the installed material and spot repair can prolong system life. For specific information, contact your Sherwin-Williams representative.

DISCLAIMER

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Consult your Sherwin-Williams representative to obtain the most recent Product Data Information and Application Bulletin.

### WARRANTY

The Sherwin-Williams Company warrants our products to be free of manufacturing defects in accord with applicable Sherwin-Williams quality control procedures. Liability for products proven defective, if any, is limited to replacement of the defective product or the refund of the purchase price paid for the defective product as determined by Sherwin-Williams. NO OTHER WARRANTY OR GUARANTEE OF ANY KIND IS MADE BY SHERWIN-WILLIAMS, EXPRESSED OR IMPLIED, STATUTORY, BY OPERATION OF LAW OR OTHERWISE, INCLUDING MER-CHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.
